CAREER OBJECTIVE

Aspiring Game Developer with foundational knowledge of Unity and C#, currently building 2D and 3D games to strengthen skills in gameplay programming, physics, and UI development. Enthusiastic about learning through hands-on projects and eager to contribute to creative and collaborative game development teams.

PROJECTS

Unity Game Development

Ghost Licence – 3D Puzzle-Adventure Game (Unity 6)

- Designed a 3D puzzle-solving game for the “Just Getting Started” game jam theme.
- Players control a ghost character who unlocks abilities by solving puzzles to progress through levels.
- Features progressive mechanics, environmental interaction, and a final boss-style challenge with multiple enemies.
- Focused on clean level design, smooth difficulty progression, and engaging gameplay feedback.
- Built using Unity 6 and C# with custom scripts, audio integration, and trigger-based logic.

Rocket Boost – Rocket Landing Game (Unity 6)

- Created a physics-based rocket game with thrust/rotation control and landing zones.
- Added particle effects, audio feedback, and scene transitions using C# scripting.

Obstacle Dodge Game – 3D Challenge Game (Unity 6)

- Developed a game where the player avoids multiple moving obstacles to survive.
- Included animated traps, collision logic, and replayable level design.

Rolling-Ball – 3D Collectible Game (Unity 6)

- Built a simple 3D game with player-controlled movement and a chasing enemy.
 - Implemented collision-based win/loss system and real-time score tracking.
